

## **PRESS RELEASE**

# **Ovivo Awarded another Large Energy Contract Worth over \$4 Million in Southeast Asia**

**Montreal, Canada, May 29, 2015**

Ovivo Inc. (“Ovivo”) has been awarded a contract to supply a polishing demineralization water system for a power plant in Southeast Asia. Through its heritage brand Christ Water Technology, Ovivo will supply equipment meeting the requirements for ultra-clean demineralized water and complying with the feed water guidelines for high pressure boilers. The contract is worth over \$4 million Canadian and the delivery is scheduled for 2016.

“This additional large energy contract awarded to us continues to demonstrate that we are capitalizing on our strengths of being a global technology and solution provider to the energy market”, said Marc Barbeau, President and Chief Executive Officer. “We like to partner with world-renowned clients who select us for the quality of our solutions and our capacity to support them wherever their projects are located across the world, thanks to our global platform”, added Mr. Barbeau.

Ovivo’s system is part of a co-generation plant that will not only supply steam and power to the petrochemical plants and the other facilities in the complex, but it will also supply power to the national grid for public consumption. The scope of supply includes the engineering, manufacturing and commissioning of four lines of carbon activated filters and mixed bed filters to further demineralize the water coming from the centralized demineralized water supply.

### **About Ovivo**

Ovivo Inc. is a global company dedicated to water and wastewater treatment. It offers comprehensive technological solutions, as well as services and equipment tailored to specific client needs. Ovivo operates in over 15 countries with more than 800 employees. Ovivo is a public company whose shares trade on the Toronto Stock Exchange under the ticker symbols OVI.A and OVI.B.
